Profile

Enthusiastic MERN Stack Developer with strong skills in MongoDB, Express.js, React.js, and Node.js. Proficient in building dynamic and responsive web applications with a focus on clean code and userfriendly interfaces. Completed a comprehensive MERN Stack. Eager to contribute to innovative projects and grow as a full-stack developer.

Projects

E-Commerce Website 🔗

An interactive e-commerce website built with HTML, CSS, JavaScript, and modern frameworks, featuring a responsive design, intuitive navigation, and appealing aesthetics. Key features include product listings, categorization, and a clean, performance-optimized layout, showcasing expertise in frontend development and user-focused design.

Dashboard Task Management 🔗

This Task Management Dashboard is a responsive web application for organizing tasks efficiently. It allows users to add, edit, filter, and delete tasks, complete with status updates and timestamps. Built with React, Material-UI, and localStorage, it ensures smooth functionality and user-friendly design.
